

The background features a night cityscape with illuminated buildings and a waterfront. A network of white lines connects several white circular nodes, with a prominent location pin icon in the center. A large green arrow points from the bottom left towards the right, partially overlapping the cityscape image.

AutoDCR[®]

**The technology to deliver on
the plan for smart cities**

► The Technology to Deliver on the Plan for Smart Cities

Proven software for e-plan review and construction permits

AutoDCR[®] is an innovative e-plan review and approval system for issuing construction permits. It reads the CAD drawings and automatically checks them for compliance with relevant building codes to facilitate approvals by competent authorities. It's being used in 500+ counties & municipalities in India. AutoDCR[®] has seamlessly integrated online approval workflow to upload the proposals with CAD drawings & required documents, track the progress of proposals through a mobile app on real time basis, schedule & monitor site inspection visits and download the construction permits once they're approved.

► AutoDCR[®] – Overview and Key Features

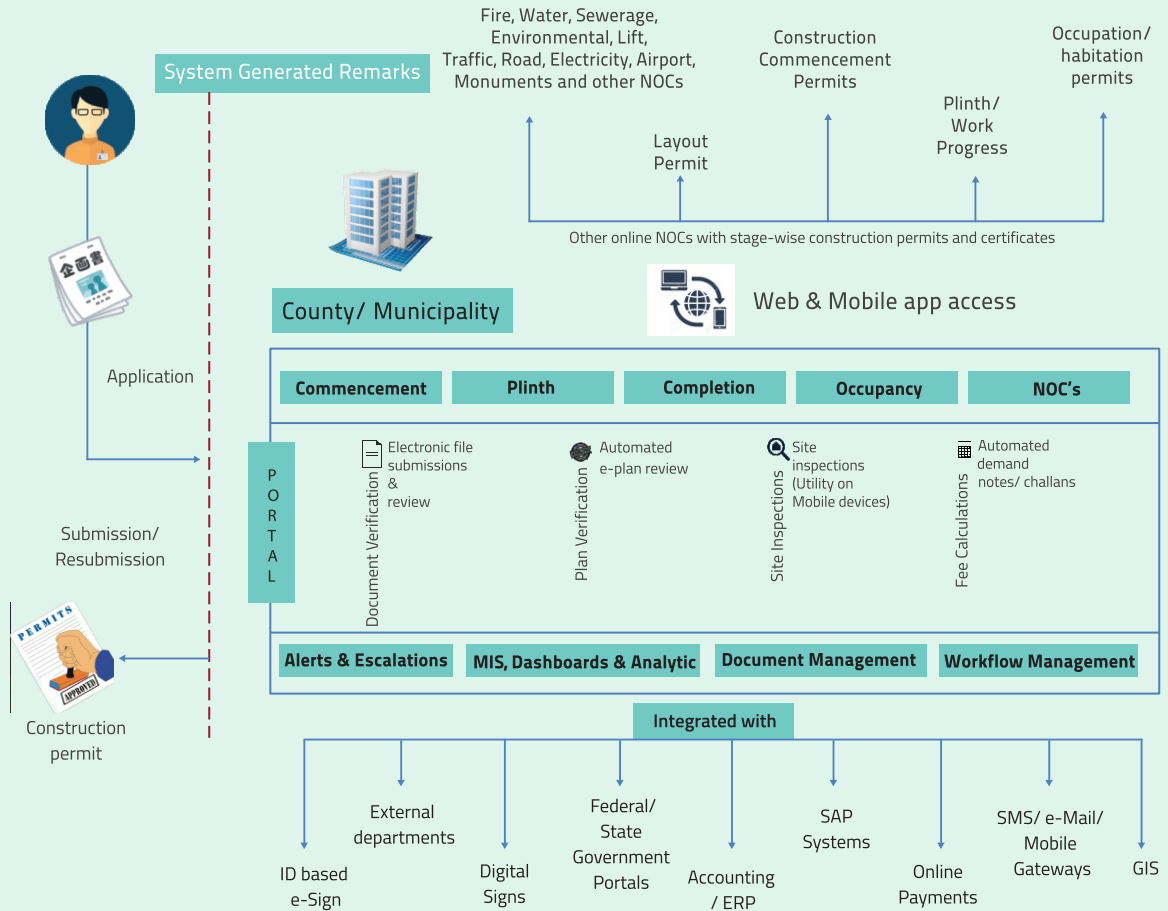

- **Uniformity and Compliance** - The approval is based on uniform interpretation of building codes bringing in uniformity and compliance.
- **Acceleration** - AutoDCR[®] accelerates the e-plan review process by eliminating lengthy and cumbersome computations.
- **Process Innovation & Integration** - The transformation of the e-plan review and issuing construction permits through CAD and workflow technology brings in innovation in the process. All stakeholders concerned in the approval process are brought together on a single platform.
- **Accountability** - Authorized roles and responsibilities are mapped and MIS reports are generated to help track process efficiency.
- **Transparency** - Subjectivity in the plan review and permitting process is totally eliminated and clear reasons are stated for approvals or rejections.

Who is it for:

- Counties and municipalities administration
- Smart city managers
- Permitting authorities
- Architects, Town Planners and Designers

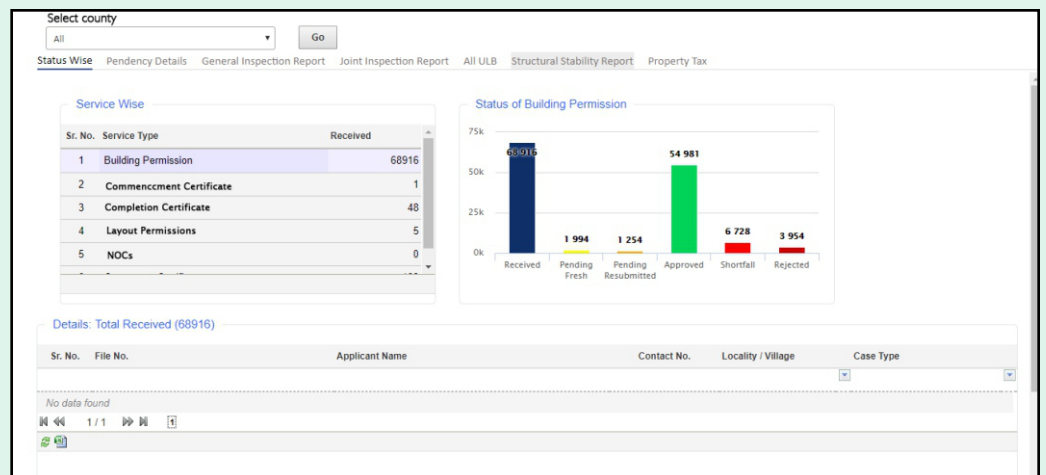

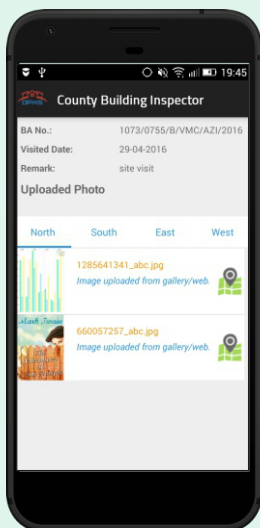

AutoDCR[®] is the most widely used AEC software for e-Governance of e-plan review and construction permitting, with 500+ municipal bodies served across India.

▶ AutoDCR – Process Flow

▶ MIS Reports, Dashboard & Site Inspections

- ▶ Mobile App
- ▶ Site inspection reports
- ▶ MIS & Dashboard

Building inspectors from authorities upload inspection reports through mobile app, along with geo-tagged site photos.

MIS reports and dashboard facilitate understanding of project status on real time basis for business intelligence and to take relevant management decisions.

► Benefits to Stakeholders

Citizens

- First Come First Serve
- Transparency in approval process.
- Anywhere & anytime access.
- Simplification of procedure and process.

Consultants

- Online submission
- Alerts through SMS / eMails.
- Proposal Status. information available on real-time basis.
- Uniform interpretation of Bye-laws.

Authorities

- Consistency in interpretation of rules.
- Generation of MIS report & evaluation of workforce efficiency.
- Storage & archival of all digitized data records.
- Escalation in case of unnecessary delays.
