Airport Authority of India (AAI) Joins Hands with SoftTech for its NOCAS Application

The Airport Authority of India (AAI) is a statutory body working under the jurisdiction of the Directorate General of Civil Aviation, Ministry of Civil Aviation, Government of India, and is responsible for creating, upgrading, maintaining and managing civil aviation infrastructure in India.

The AAI issues permit guidelines for controlling the heights of buildings and other infrastructures near the airport. The Authority uses the No Objection Certificate Application System (NOCAS) application for processing the no objection height clearance applications for various construction activities in the vicinity of airports. The Authority has set the objective to enhance and maintain the Software application to expedite and bring transparency to the function of the issue of No Objection Certificates (NOCs) all over India.

The AAI has selected Pune-based SoftTech Engineers Limited as its Application Maintenance & Development Service Partner (AMDSP) for the Maintenance & Development of No Objection Certificate Application System (NOCAS). While assuring faster processing time for NOCs, the NOCAS also ensures minimal human intervention and 24*7 accessibility.

Under this agreement, SoftTech will develop and maintain the NOCAS Application for the next five years and will also operate and manage the existing system of the application.

Sharing his thoughts on this agreement, Mr. Vijay Gupta, Founder and Managing Director, SoftTech Engineers, said, “We’re much delighted for this association with AAI. This association charts a new roadmap in the field of permit issuance for the aviation sector. The application serves as a single-window clearance system (SWCS) for the AAI, and I believe our association will take this system to the new level and will meet the objectives of AAI in significantly reducing the time taken for providing NOCs. SoftTech has proven its capabilities on several occasions when it came to processing efficiency and simplicity. We have done it with many state-level local bodies and cities in India, and with AAI we have got the great opportunity to prove our capabilities at the national level”
